

AN ENGINEERING BENCHMARK

GIBB, a well-known company in the engineering and consulting sector tells of its operations, people and solutions.

A leader in Africa with a global reach, GIBB is a multi-disciplinary engineering and science consulting company whose dynamic solutions to the continent's unique challenges have contributed to an unprecedented record of technological excellence. For over half a century, GIBB's expertise and professionalism have been paramount in moulding the potential of this continent, promoting sustainable growth and socio-economic prospects.

GIBB's skills and experience span the entire spectrum of engineering consulting services and its profound African expertise has established the company as a preferred partner for both local and international companies. Clients enjoy the benefits of a holistic service offering – by combining expertise and technical excellence, it is equipped to service most aspects of project delivery, while maintaining a high quality standard throughout the project value chain.

GIBB is an undisputed leader on the African continent for infrastructure planning and delivery. Its multi-disciplinary engineering and science services, developed over half a century of unreserved commitment to sustainable growth, have become industry benchmarks for ingenuity and excellence.

Renowned for its professionalism, reliability and cost-effective technological solutions, GIBB has developed solid national and international associations with companies in the public and private sector to grow the potential of Africa.

SOUTH AFRICAN OPERATIONS

GIBB's head office is located in Sunninghill, Johannesburg. The company has offices in every major city in the country, which enables GIBB to become closely involved with every aspect of South Africa's recent rapid development. GIBB's professionalism and reputation for ingenuity and excellence have attracted and retained a highly proficient skills-base recognised for its ability to devise the most pertinent and sustainable solutions for the country's specific urban and rural challenges.

SADC & AFRICAN OPERATIONS

GIBB's extensive network of technical excellence encompasses East and West Africa and most member countries of the Southern African Development Community (SADC), including Angola, Botswana, Kenya, Mauritius, Mozambique, Nigeria and Swaziland. This has created wide-ranging operational infrastructure, world-class systems and a highly skilled workforce which have established

GIBB as a preferred strategic partner in sub-Saharan Africa with local and international companies in both the private and public sector.

GIBB's policy of sustainability ensures that each project utilises the resources and manpower available in its own region, optimising local development potential to leave a lasting legacy of growth and opportunity.

GIBB is an undisputed leader on the African continent for infrastructure planning and delivery.

PEOPLE

Success and growth are created by people, not systems. GIBB people take pride in excellence and bring unreserved commitment to each project. The highly-talented, creative engineers and scientists who cover the entire industry spectrum are specialists in their fields with a well-developed understanding of related sectors. Their accumulated expertise has created an unparalleled record of technical intelligence and engineering excellence which has entrenched GIBB as a preeminent multi-disciplinary engineering and consulting force in Africa.

SOLUTIONS

GIBB is renowned for its dynamic professionalism, reliability, performance excellence and expertise. It is unreservedly committed to understanding the complexities of customer requirements on each specific project so solutions are targeted, pertinent and cost-effective.

GIBB's multi-disciplinary talent, technical expertise and in-depth knowledge of Africa and its unique conditions enable the company to devise creative, tailor-made solutions within budget and deadline constraints. GIBB's integrated, multi-disciplinary approach ensures a seamless delivery on most aspects of project delivery, which promotes efficiency, professionalism and quality through the entire project value chain. Clients are considered partners who enter into long-term relationships and are thus assured of the success of projects which GIBB undertakes. **tp**
